

POINT-OF-SALE MANAGEMENT INFORMATION SYSTEM

The washlink transaction terminal is a full featured industrial PC that functions as a programmable cash register, and seamlessly integrates with the washlink equipment controller to provide superior cash accountability and employee management control.

Features and Benefits:

- large 15" touch screen with unprecedented functionality, durability, quality and affordability
- fully integrated with washlink equipment controller, but functionally independent - terminal will not shut down car wash tunnel operation
- all standard reporting including cars/man hour, labor \$ and %, etc
- suggestive selling on all packages to promote up-selling
- uninterruptible power supply for maximum protection
- multiple cash drawer support for maximum cash control and flexibility
- high speed receipt printer
- integrated 3-line card reader for credit, debit and gift/loyalty cards
- customer loyalty module built in
- biometric (finger print) login for maximum security
- washlink equipment controller interface built in
- prepaid coupon control (coupons not valid until sold!)
- customizable screens are very user friendly
- customizable reports will export to user spreadsheet programs such as excel or quickbooks
- fleet accounts supported
- wireless handheld sales and credit card acceptance
- e-mail/text messaging provides on-the-go reports and alerts
- remote access to all screens from any computer with internet access
- multi site replication between all stores and office or home
- free web based support
