WASH SOLUTIONS • POINT OF SALE CONTROLLERS • MOTOR CONTROLLERS

Washlink lives by a simple philosophy: we've done our job if we've made your job easier. We strive toward this goal daily by bringing you the world's best in automation technology and techniques, and by pioneering methods when a new unfilled need is found. Our solutions are unequalled in the industry! But don't just take our word for it. We invite you to speak with one of our clients...or better yet call and talk to us! We invite you to come and visit our headquarters located in northern California and see your high tech operation. We feel it won't take you long to realize we're not your typical car wash controls or point of sale (POS) vendor.

We're Washlink and we look forward to showing you a better way!
