# ANTI-COLLISION CONTROLLER

The washlink anti-collision controller is simply the best collision control system in the car wash industry. Proven industrial PLC technology combined multiple detection devices provide the car wash operator with unmatched accuracy and reliability.

Features and Benefits:
- able to use input device of choice, eyes, loop, wands etc.
- industry proven components from siemens worldwide
- built in car counter for added security
- external reset
- equipment stop on isolation relay, use any voltage
- warning isolation relay, use any warning device, horn, light etc.
- equipment auto re-start on isolation relay, use any voltage
- corrosion and rust proof enclosure
- lockable enclosure
- easy to see indicator lights
- optional eyes on stainless stands, in-ground loops, loop pads
- ul listed
